

RISK DISCLOSURE AND WARNINGS NOTICE

Last Updated April 2020

PART A – RISKS ASSOCIATED WITH ALL FINANCIAL INSTRUMENTS

1. Introduction

1.1 This Risk Disclosure and Warning Notice (“Notice”) is provided to you (our Client and prospective Client) in accordance with the Investment Services and Activities and Regulated Markets Law of 2017 87(I)/2017, as subsequently amended from time to time (“the Law”), which is applicable to The First Interstellar Capital Limited (“the Company”, “we”).

1.2. All Clients and prospective Clients should read carefully the following risk disclosures and warnings contained in this Notice, before applying to the Company for a Trading Account and before they begin to accept any services from the Company. However, it is noted that this document cannot and does not disclose or explain all risks and other significant aspects involved in dealing in the Financial Instruments offered by the Company. This notice was designed to explain in general terms the nature of the risks involved when dealing in Financial Instruments on a fair and non-misleading basis.

1.3. The Company executes Client Orders in relation to Contracts for Differences (“CFDs”) in stocks, commodities, indices and currency pairs (FX), etc. The products and services offered by the Company are intended for small to large scale retail and professional investors with knowledge and experience of the industry who feel comfortable trading complex financial instruments, who want to trade with money they can afford to lose and have high risk tolerance. Prospective clients will understand the impact of and risks associated with margin trading, its key concepts, along with leverage and the potential to bear losses of the entire invested capital.

2. Charges and Taxes

2.1. The Provision of Services by the Company to the Client may be subject to fees, available on the Company’s trading platform(s) and website. Before the Client begins to trade, he/she should obtain details of all fees, commissions, charges for which the Client may be subjected to. It is the Client’s responsibility to check for any changes related to the charges.

2.2. If any charges are not expressed in monetary terms (but, for example, as a percentage or formula), the Client should ensure that he/she understands what such charges are likely to amount to or how there are represented.

2.3. The Company may change its costs and associated charges at any time, according to the provisions of the Client Agreement found on the Company's website.

2.4. There is a risk that the Client’s trades in any financial instruments may be or become subject to tax and/or any other duty for example because of changes in legislation or his/her personal circumstances. The Company does not warrant that no tax and/or any other stamp duty will be applicable/payable. The Company does not offer tax advice and recommends that the Client seek advice from a competent tax professional, should the Client have any questions.

2.5. The Client is responsible for any taxes and/or any other duty which may accrue in respect of his/her transactions.

2.6. It is noted that taxes, if any, are subject to change without notice.

2.7. If required by applicable legislative requirements, the Company shall deduct at source from any payments due to the Client, such amount(s) as may be required by the tax authorities.

2.8. It is possible that other costs, including taxes, relating to Transactions carried out on the Company's trading platform(s) may arise for which the Client is liable and which are neither paid via the Company nor imposed by the Company. Although it is the Client's sole and entire responsibility to account for tax due and, without derogating from this, the Client agrees that the Company may deduct tax, as may be required by the applicable legislative requirement, with respect to his/her trading activity on the trading platform(s). The Client is aware that the Company has a right of set-off against any amounts in the Client's trading account(s) with respect to such tax deductions.

2.9. It is noted that the Company's prices in relation to CFDs trading are set/quoted in accordance to the Company's Best Interest and Order Execution Policy which is available on the Company's website. It is noted that Company's prices may be different from prices offered for trading elsewhere. The prices displayed on the Company's trading platform(s) reflects the last known available price at the moment, prior to placing any Order, however, the actual execution price of the Order may differ, in accordance with the Company's Best Interest and Order Execution Policy and the Client Agreement. As such, the price that the Client receives when opening/closing position(s) may not directly correspond to real time market levels, at the point in time at which the purchase/sale of the relevant CFD occurs or reflect the prices of third party broker/liquidity provider(s).

3. Third Party Risks

3.1. It is understood that the Company will promptly place Client(s)' money received into one or more segregated account(s) (denoted as "Clients' accounts") with reliable financial institutions (within or outside Cyprus or the EEA) such as a credit institution and/or bank in a third country. The Company shall exercise due skill, care and diligence in the selection of the financial institution according to applicable legislative requirements. It is understood that there are circumstances beyond the control of the Company and hence the Company does not accept any liability or responsibility for any resulting losses to the Client due to the insolvency or any other analogous proceedings or failure of the financial institution where Client(s)' money are held.

3.2. The financial institution (of paragraph 3.1.) where Client(s)' money are held may be within or outside Cyprus or the EEA. It is understood that the legal and regulatory regime applying to any such financial institution outside Cyprus or the EEA will be different from that of Cyprus. Hence, in the event of the insolvency or any other equivalent failure or proceeding of that person, the Client's money may be treated differently from the treatment which would apply if the money was held in a Segregated Account in Cyprus.

3.3. The financial institution where the Client(s)' funds are passed to, may hold it in an omnibus account. In the event of the insolvency or any other analogous proceedings in relation to that financial institution, the Company may only have an unsecured claim against the financial institution on behalf of the Client, and the Client will be exposed to the risk that the money received by the Company from the financial institution is insufficient to satisfy the claims of the Client with claims in respect of the relevant Client(s)' account(s). The Company does not accept any liability or responsibility for any resulting losses. In general, accounts held with financial institutions, including omnibus account(s), face various risks, including the potential risk of being treated as one (1) account in case where the relevant financial institution, in which the Client(s)' funds are held, defaults. Under such circumstances, any applicable deposit guarantee scheme may be applied without consideration of the Client as the ultimate beneficial owners of the omnibus Account. In addition, resolution measures may be taken in such a case, including the bail-in of Client(s)' funds.

3.4. The Company may deposit Client(s)' money with a depository who may have a security interest, lien or right of set-off in relation to that money.

3.5. A Bank and/or Broker that the Company has a business relationship could have interests contrary to the Client's Interests.

3.6. It is understood that the Company does not execute Client Orders on own account basis, i.e. as principal to principal against the Client; the Company receives and then transmits and executes Client(s)' Orders with a third party (the Liquidity Provider). This is known and straight through process and is explained in the "Summary Best Interest and Order Execution Policy" found at the Company's website. In the event where the relevant Liquidity Provider does not enough liquidity for execution of the Client's existing position, the Company will not be in a position to settle the transaction for the Client.

4. Insolvency

4.1. The Company's insolvency or default or the insolvency or default of any parties involved in Transactions undertaken by the Company on the Client's behalf (including without limitation brokers, execution venues and liquidity providers), may lead to position(s) being liquidated or closed out without the Client's consent and, as result, the Client may suffer losses. In the unlikely event of the Company's insolvency, segregated client funds cannot be used for reimbursement to the Company's creditors. If the Company is unable to satisfy repayment claims, eligible claimants have the right to compensation by the Investor Compensation Fund as stated below.

4.2 The Company, as the provider of a CFD, may become temporarily or permanently insolvent, resulting in its inability to meet its obligations. The solvency of an issuer may change due to one or more of a range of factors including the financial prospects of the issuing company, the issuer's economic sector and/or the political and economic status of the countries where it and/or its business are located. The deterioration of the issuer's solvency will influence the price of the securities that it issues.

5. Investor Compensation Fund

5.1. The Company participates in the Investor Compensation Fund for Clients of Investment Firms regulated in the Republic of Cyprus. Claims of the covered Clients against the Company may be compensated by the Investor Compensation Fund where the Company is unable, due to its financial circumstances. Compensation shall not exceed twenty thousand Euros (EUR 20.000) for each entitled Client. For more details please refer to the "Investor Compensation Fund Notice" found on the Company's Website.

6. Technical Risks

6.1. The Client and not the Company shall be responsible for the risks of financial losses caused by failure, malfunction, interruption, disconnection or malicious actions of information, communication, electricity, electronic or other systems, which are not the result of gross negligence or wilful default of the Company.

6.2. If the Client undertakes transactions on an electronic system, he/she will be exposed to risks associated with the system including the failure of hardware, software, servers, communication lines and internet failure. The result of any such failure may be that his/her Order is either not executed according to Client's instructions or it is not executed at all. The Company does not accept any liability in the case of such a failure.

6.3. The Client acknowledges that the unencrypted information transmitted by e-mail is not protected from any unauthorized access.

6.4. At times of excessive number of request(s), the Client may have some difficulties to connect to the Company over the phone and/or the Company's trading platform(s)/system(s), especially in fast Market (for example, when key macroeconomic indicators or news are released).

6.5. The Client acknowledges that the internet may be subject to events which may affect his/her access to the Company's websites and/or the Company's trading platform(s)/system(s), including but not limited to interruptions

or transmission blackouts, software and hardware failure, internet disconnection, public electricity network failures or hacker attacks. The Company is not responsible for any damages and/or losses resulting from such events which are beyond the Company's reasonable control or for any other losses, costs, liabilities, or expenses (including, without limitation, loss of profit) which may result from the Client's inability to access the Company's website and/or trading platform/system(s) or delay or failure in sending Orders or Transactions.

6.6. In connection with the use of computer equipment, data and voice communication networks, the Client bears the following risks amongst other risks, in which cases the Company has no liability of any resulting loss:

- (a) Power cut of the equipment on the side of the Client or the provider or communication operator (including voice communication) that serves the Client;
- (b) Physical damage (or destruction) of the communication channels used to link the Client and provider (communication operator), provider, and the trading or information server of the Client;
- (c) Outage (unacceptably low quality) of communication via the channels used by the Client, or the channels used by the provider, or communication operator (including voice communication) that are used by the Client or the Company;
- (d) Wrong or inconsistent with requirements settings of the Client Terminal;
- (e) Untimely update of the Client Terminal;
- (f) When carrying out transactions via the telephone (land or cell phone lines) voice communication, the Client runs the risk of problematic dialling, when trying to reach the Company or an employee of the Company due to communication quality issues and communication channel loads;
- (g) The use of communication channels, hardware and software, generate the risk of non-reception of message(s), including text messages, by the Client from the Company;
- (h) Trading over the phone might be impeded by overload of connection;
- (i) Malfunction or non-operability of the trading platform(s), which also includes the Client Terminal.

6.7. The Client may suffer financial losses caused by the materialization of the above risks and the Company accepts no responsibility or liability in the case of such a risk materializing and the Client shall be responsible for all related losses he/she may suffer.

7. Trading Platform

7.1. The Client is warned that when trading through electronic trading platform(s) he/she assumes risk(s) of financial loss which may be a consequence of amongst other things:

- Failure of the Client's devices, software and poor quality of connection;
- The Company's or the Client's hardware or software failure, malfunction or misuse;
- Improper work of the Client's equipment;
- Wrong setting of the Client's Terminal;
- Delayed updates of the Client's Terminal.

7.2. The Client acknowledges that only one Instruction is allowed to be in the queue at one time. Once the Client has sent an Instruction for an Order, a new Instruction can be given to the Company.

7.3. The Client acknowledges that the only reliable source of Quotes Flow information is that of the live Server's Quotes Base. Quotes Base in the Client Terminal is not a reliable source of Quotes Flow information because the connection between the Client Terminal and the Server may be disrupted at some point and some of the Quotes simply may not reach the Client Terminal or reach at erroneous price(s).

7.4. The Client acknowledges that if the Client closes the Order "placing/deleting" window or the position "opening/closing" window, an Instruction, which has been sent to the Server, shall not be cancelled.

7.5. Orders may be executed one at a time while being in the queue. Multiple orders from the same Trading Account, at the same time, may not be executed.

7.6. The Client acknowledges that if the Client closes an Order, upon sending to the Server, it shall not be cancelled.

7.7. In case the Client has not received, as a result of Force Majeure Events, the execution of the previously sent Order but decides to repeat the Order, the Client shall accept the risk of making two Transactions instead of one.

7.8. The Client acknowledges that if a Pending Order has already been executed but the Client sends an instruction to modify its level, the only instruction, which will be considered by the Server, is the instruction to modify Stop Loss and/or Take Profit levels on the position opened when the Pending Order triggered.

8. Force Majeure Events

8.1. In case of a Force Majeure Event the Company may not be in a position to arrange for the execution of Client(s)' Orders or fulfil its obligations under the Client Agreement. As a result, the Client may suffer financial loss.

8.2. The Company will not be liable or have any responsibility for any type of loss or damage arising out of any failure, interruption, or delay in performing its obligations under the Client Agreement where such failure, interruption or delay is due to a Force Majeure Event.

9. Communication between the Client and the Company

9.1. The Client shall accept the risk of any financial losses caused by the fact that the Client has received with delay or has not received at all any notice from the Company.

9.2. The Client acknowledges that the unencrypted information transmitted by e-mail is not protected from any unauthorized access.

9.3. The Company has no responsibility if unauthorized third persons have access to information, including electronic addresses, electronic communication and personal data, access data when the above are transmitted between the Company and the Client or when using the internet or other network communication facilities, telephone, or any other electronic means.

9.4. The Client is fully responsible for the risks in respect of undelivered internal messages through the Company's trading system(s) or mail messages sent to the Client by the Company.

10. Abnormal Market Conditions

10.1. The Client acknowledges that under Abnormal Market Conditions, the period during which the Orders are executed may be extended or it may be impossible for Orders to be executed at requested prices or may not be executed at all.

10.2. Abnormal Market Conditions include but not limited to times of rapid price fluctuations of the price, rises or falls in one trading session to such an extent that, under the rules of the relevant exchange, trading is suspended or restricted, or there is lack of liquidity, or this may occur at the opening of trading sessions.

11. Foreign Currency

11.1. When a Financial Instrument is traded in a currency other than the currency of the Client's country of residence and/or trading account, any changes in the exchange rates may have a negative effect on its value, price and performance and may lead to losses for the Client.

12. Regulatory and Legal Risk

12.1. A change in laws and regulations may materially impact financial instrument(s) and/or investments in a sector or market. A change in laws or regulations made by a government or a regulatory body or a decision reached by a judicial body can increase business operational costs, lessen investment attractiveness, change the competitive landscape and as such alter the profit possibilities of an investment. This risk is unpredictable and may vary from market to market.

PART B – GENERAL INFORMATION ON RISKS ASSOCIATED WITH SPECIFIC FINANCIAL INSTRUMENTS

13. INTRODUCTION

Trading CFDs can put the Client's capital at risk, especially if used in a speculative manner. CFDs are categorized as high risk complex financial instruments and Clients may lose the amount invested. The Company offers Negative Balance Protection to all of its Retail Clients. Trading CFDs is not suitable for all investors.

The investment decisions made by the Clients are subject to various markets, currency, economic, political, business risks etc., and will not necessarily be profitable. The Client acknowledges and without any reservation accepts that, notwithstanding any general information which may have been given by the Company, the value of any investment in financial instruments may fluctuate either upwards or downwards.

The Client acknowledges and without any reservation accepts the existence of a substantial risk of incurring losses and damages as a result of buying or selling any financial instrument and acknowledges his/her willingness to take such risk.

Set out below is an outline of the major risks and other significant aspects of CFDs trading:

13.1. Trading in CFDs is VERY SPECULATIVE AND HIGHLY RISKY and is not suitable for all members of the general public but only for those investors who:

- a) understand and are willing to assume the economic, legal and other risks involved;
- b) taking into account their personal financial circumstances, financial resources, life style and obligations are financially able to assume the loss of their entire investment;
- c) have the knowledge to understand CFDs trading and the underlying assets and markets.

13.2. The Company will not provide the Client with any advice relating to CFDs, the underlying assets and markets or make investment recommendations including occasions where the Client may request such advice and/or recommendation. However, the Company may provide the Client with information and tools produced by third parties on an "as is" basis (i.e. the Company does not approve, or endorse, or affect the said information and or

tools), which may be indicative of trading trends or trading opportunities. The Client accepts and understands that taking any actions based on the information and/or tools provided by third parties may result in losses and or general reduction of value of the Client's assets. The Company does not accept liability for any such losses resulting from actions taken by the Client on the basis of information and/or tools produced by third parties.

13.3. CFDs are derivative financial instruments which derive their value from the prices of the underlying assets/markets in which they refer to (for example currency, equity indices, stocks, metals, indices futures, forwards etc). It is important therefore that the Client understands the risks associated with trading in the relevant underlying asset/market because fluctuations in the price of the underlying asset/market will affect the profitability of the Client's trade(s).

13.4. Information of the previous performance of CFDs, the underlying assets/markets does not guarantee its current and/or future performance. The use of **historical** data does not constitute a binding or safe forecast as to the corresponding future performance of the CFDs to which the said information refers.

13.5. Leverage and Gearing

13.5.1. Transactions in foreign exchange and derivative financial instruments carry a high degree of risk. The amount of initial margin may be small relative to the value of the foreign exchange or derivatives contract so that transactions are "leveraged" or "geared".

13.5.2. A relatively small market movement will have a proportionately larger impact on the funds the Client has deposited or will have to deposit; this may work against the Client as well as for the Client. The Client may sustain a total loss of initial Margin funds and any additional funds deposited with the Company to maintain position(s). If the market moves against the Client's position(s) and/or Margin requirements are increased, the Client may be called upon to deposit additional funds, on short notice, to maintain relevant position(s) open. Failing to comply with a request for a deposit of additional funds, may result in closure of relevant position(s) by the Company, on behalf of the Client, and the Client will be liable for any resulting loss or deficit.

13.6. Risk-reducing Orders or Strategies

13.6.1 The placing of certain Orders (e.g. "Stop Loss" orders, where permitted under local law, or "Stop Limit" Orders), which are intended to limit losses to certain amounts, may not be adequate given that market conditions make it impossible to execute such Orders, e.g. due to illiquid or high volatile market. Strategies using combinations of positions, such as "spread" and "straddle" positions may be as risky as taking simple "long" or "short" positions. Therefore, Stop Limit and Stop Loss Orders cannot guarantee the limit of loss.

13.6.2. Trailing Stops and Expert Advisors cannot guarantee the limit of loss.

13.7. Volatility:

13.7.1. Some financial instruments trade within wide intraday ranges with volatile price movements. Therefore, the Client must carefully consider that there is a high risk of losses. The price of CFDs is derived from the price of the underlying asset in which the relevant CFD refers to. CFDs and related underlying markets can be highly volatile. The prices of CFDs and the underlying asset may fluctuate rapidly and over wide ranges and may reflect unforeseeable events or changes in conditions, none of which can be controlled by the Client or by the Company. Under certain market conditions it may be impossible for Client(s)' Order to be executed at requested prices leading to losses. The prices of CFDs and the underlying assets will be influenced by, amongst other things, changing supply and demand relationships, governmental, agricultural, commercial and trade programs and policies, national and international political and economic events and the prevailing psychological characteristics of the relevant market place.

13.8. Margin

13.8.1. The Client acknowledges and accepts that, regardless of any information which may be offered by the Company, the value of CFDs may fluctuate downwards or upwards and it is even probable that the investment may become of no value. This is owed to the margining system applicable to such trades, which generally involves a comparatively modest deposit or margin in terms of the overall contract value, so that a relatively small movement in the underlying asset/market can have a disproportionately dramatic effect on the Client's trade(s).

13.9. Liquidity:

13.9.1. Some of the Underlying Assets may not become immediately liquid as a result of reduced demand for the underlying asset, and the Client may not be able to obtain the information on the value of these or the extent of the associated risks.

13.10. Contracts for Differences

13.10.1. The CFDs available for trading with the Company are non-deliverable transactions giving an opportunity to make profit based on price changes of the underlying asset (eg. cash indices, index futures, bond futures, commodity futures, spot crude oil, spot gold, spot silver, single stocks, currencies or any other asset according to the Company's discretion from time to time). On the other hand, small adverse market movement can not only quickly result in the loss of the Clients' entire deposit but also any additional commissions and other expenses may be incurred. So, the Client must not enter into CFD trading unless he/she is willing to undertake the risks of losing all the money which were invested, entirely, in addition to any additional commissions and other expenses that may be incurred.

13.10.2. Investing in a CFD carries the same risks as investing in a future or an option and the Client should be aware of these, as set out above. Transactions in CFDs may also have a contingent liability and the Client should be aware of the implications, as set out below under "Contingent Liability Investment Transactions".

13.11. Off-exchange transactions in Derivative Financial Instruments:

13.11.1. CFDs offered by the Company are off-exchange transactions (i.e. over-the-counter). The trading conditions are set by us (in line with the trading conditions received from our liquidity providers), subject to any obligations we have to provide best execution, to act reasonably and in accordance with our Client Agreement and with our Best Interest and Order Execution Policy. Each CFD order that the Client opens through the Company's trading platform(s) results in the entering of an Order with the Company; such Order(s) can only be closed with the Company and are not transferable to any other person.

While some off-exchange markets are highly liquid, transactions in off-exchange or non-transferable derivatives may involve greater risk than investing in on-exchange derivatives because there is no exchange market on which to close out an Open Position. It may be impossible to liquidate an existing position, to assess the value of the position arising from an off-exchange transaction or to assess the exposure to risk. Prices may not be quoted, and, even where they are, they will be established by market makers of these instruments and consequently it may be difficult to establish what a fair price is.

13.11.2. In regards to transactions in CFDs, the Company is using an Online trading platform(s) for transactions in CFDs which does not fall into the definition of a recognized exchange as this is not a Multilateral Trading Facility, and so does not have the same protection.

13.12. Contingent Liability Investment Transactions

13.12.1. Contingent liability investment transactions, which are margined, require the Client to make a series of payments against the purchase price, instead of paying the whole purchase price immediately. The Margin

requirement will depend on the underlying asset of the relevant CFD. Margin requirements can be fixed or calculated from the current price of the underlying instrument and can be found on the trading platform(s) and/or the Company's website.

13.12.2. When the Client trades in CFDs, he/she may sustain a total loss of the funds deposited to open and maintain position(s) open. If the market moves against the Client, he/she may be called upon to pay substantial additional funds at short notice to maintain the position. If the Client fails to do so, within the time required, his/her position may be liquidated at a loss and he/she will be responsible for the resulting deficit. It is noted that the Company will not have a duty to notify the Client for any Margin Call to sustain a loss-making position(s).

13.12.3. Even if a transaction is not margined, it may still carry an obligation to make further payments in certain circumstances over and above any amount paid when entering into transaction(s).

13.12.4. Contingent liability investment transactions which are not traded on or under the rules of a recognized or designated investment exchange may expose the Client to substantially greater risks.

13.13. Collateral

13.13.1. If the Client deposits collateral as security with the Company, the way in which it will be treated will vary according to the type of transaction and where it is traded. There could be significant differences in the treatment of the collateral depending on whether the Client is trading on a recognized or designated investment exchange, with the rules of that exchange (and the associated clearing house) applying, or trading off-exchange. Deposited collateral may lose its identity as the Client's property once dealings on the Client's behalf are undertaken. Even if the Client's dealings should ultimately prove profitable, the Client may not get back the same amount(s) deposited, and may have to accept payment in cash.

13.14. Suspensions of Trading

13.14.1. Under certain trading conditions it may be difficult or impossible to liquidate a position. This may occur, for example, at times of rapid price movement if the price rises or falls in one trading session to such an extent that, under the rules of the relevant exchange, trading is suspended or restricted. Placing a Stop Loss will not necessarily limit the Client's losses to the intended amounts, because market conditions may make it impossible to execute such an Order at the stipulated price. In addition, under certain market conditions the execution of a Stop Loss Order may be worse than its stipulated price and the realized losses can be larger than expected.

13.15. No Delivery

13.15.1. It is understood that the Client has no rights or obligations in respect to the underlying assets relating to the CFDs he is trading. There is no delivery of the underlying asset.

13.16. Slippage

13.16.1. Slippage is the difference between the requested price for a transaction in financial instrument(s), and the price the Transaction is actually executed at. Slippage often occurs during periods of higher volatility (for example due to news events) making an Order at a specific price level impossible to execute, when market orders are used, and also when large Orders are executed at time when there may not be enough interest for the requested level to maintain the expected price of trade.

14. Advice and Recommendations

14.1. The Company will not advise the Client about the merits of a particular Transaction or give him/her any form of investment advice and the Client acknowledges that the Services do not include the provision of investment advice in CFDs or the underlying assets and markets. The Client alone will enter into Transactions and take relevant

decisions based on his/her own judgement. In asking the Company to enter into any Transaction, the Client represents that he/she has been solely responsible for making his/her own independent assessment and investigation into the risks of the Transaction. He/she represents that he/she has sufficient knowledge, market sophistication, professional advice (if required) and experience to make his/her own evaluation of the merits and risks of any Transaction. The Company gives no warranty as to the suitability of the products offered by the Company and assumes no fiduciary duty in its relations with the Client.

14.2. The Company will not be under any duty to provide the Client with any legal, tax or other advice relating to any Transaction. The Client should seek independent expert advice if he/she is in any doubt as to whether he may incur any tax liabilities. The Client is hereby warned that tax laws are subject to change from time to time.

14.3. The Company may, from time to time and at its discretion, provide the Client (or in newsletters which it may post on its website or provide to subscribers via its website or the trading platform(s) or otherwise) with information, news, market commentary or other information but not as a service. In such cases:

- (a) the Company will not be responsible for such information;
- (b) the Company gives no representation, warranty or guarantee as to the accuracy, correctness or completeness of such information or as to the tax or legal consequences of any related Transaction;
- (c) the information is provided solely to enable the Client to make his/her own investment decisions and does not amount to investment advice or unsolicited financial promotions to the Client;
- (d) if the information contains a restriction on the person or category of persons for whom that information is intended or to whom it is distributed, the Client agrees that he/she will not pass it on to any such person or category of persons;
- (e) the Client accepts that prior to dispatch, the Company may have acted upon it itself to make use of the information on which it is based. The Company does not make representations as to the time of receipt by the Client and cannot guarantee that he/she will receive such information at the same time as other clients.

14.4. It is understood that market commentary, news, or other information provided or made available by the Company are subject to change and may be withdrawn at any time without notice.

15. No Guarantees of Profit

15.1. The Company provides no guarantees of profit nor of avoiding losses when trading in financial instruments. The Company cannot guarantee the future performance of the Client's trading account(s), promise any specific level of performance or promise that Client's investment decisions, strategies, will be successful/profitable. The Client has received no such guarantees from the Company or from any of its representatives. The Client is aware of the risks inherent in trading in financial instruments and is financially able to bear such risks and withstand any losses that may be incurred. The Client acknowledges and accepts that there may be other additional risks apart from those mentioned above.
